

Legend

East West Rail
– Bletchley

Station used by East
West Rail services

Indicative search
area for station works

We are considering:

- Altering or replacing the current station footbridge
- Providing step-free access to platform 6
- Improving or replacing the current station building on Sherwood Drive
- Improving and enlarging the station car park
- Altering the proposed design of the new platforms for trains to and from Oxford
- Providing a further new platform, next to the current platform 6. This would be in addition to the two new platforms already under construction
- Creating a new station entrance on the east side of the station
